

IN THE CLAIMS:

Please amend claims as show below.

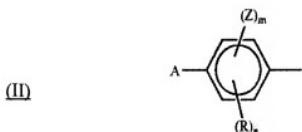

The pending claims in this application are:

1. (Currently amended) Colored iridescent film comprises a core of substantially parallel layers wherein alternate of said layers comprise a first polymer and the remaining layers comprise a second polymer comprising alternating layers of a first polymer and a second polymer, and at least one said layers contains an organic pigment comprising one or more azo compounds, wherein said iridescent film is resistant to butyl acetate.
2. (Currently amended) The colored iridescent film of claim 1 wherein said organic pigment is selected from the group consisting of phthalocyanines, perylenes, quinaeridones, and azo compounds. at least one said layers contains about 0.1% to about 5% by weight of said organic pigment.
3. (Currently amended) The colored iridescent film of claim 21 wherein said azo compound comprises one or more compounds characterized by Formula I below:

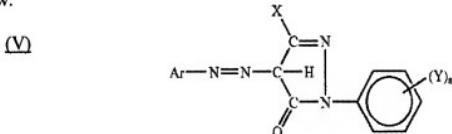

where in X is a hydrocarbyl, carboxylic acid ester, sulfonic acid ester, carboxylic acid amide or sulfonic acid amide group; Y is a hydrocarbyl,

halogen or hydrocarbyloxy group; and Ar is an aromatic moiety characterized by Formula II below:

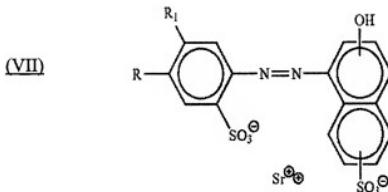

wherein A is a halogen group; each Z is independently a -COOH or -SO₃H group, or salts of such groups; m is 1 or 2; each R is independently a halogen, hydrocarbyl, hydrocarbyloxy, carboxylic acid ester, sulfonic acid ester, carboxylic amide, imidazolone, sulfonic acid amide or nitro group; and n is 0, 1, or 2.

4. (Currently amended) The colored iridescent film of claim 2 1 wherein said azo compound comprises one or more compounds characterized by Formula V below:

wherein Ar is an aromatic moiety having at least one substituent which is an acid group or salt thereof; X is a hydrocarbyl, carboxylic acid ester, sulfonic acid ester, carboxylic acid amide or sulfonic acid amide group; each Y is independently a hydrocarbyl, halogen, hydrocarbyloxy, carboxylic acid ester, sulfonic acid ester, carboxylic acid amide, imidazolone, sulfonic acid amide or nitro group; and a is 1, 2 or 3.

5. (Currently amended) The colored iridescent film of claim 2 1 wherein said azo compound comprises one or more compounds characterized by Formula VIII below:

wherein R and R_1 are independently hydrogen, chloro, methyl or ethyl groups.

6. (Original) The color iridescent film of claim 1 wherein said organic pigment is present in at least one outer layer.
7. (Original) The colored iridescent film of claim 1 wherein said organic pigment is present in a least one inner layer.
8. (Currently amended) The colored iridescent film of claim 1 wherein said core comprises core outer layers and core inner layers located between said core outer layers, and wherein the thickness of at least one of said core outer layers is greater than the thickness of at least one of said core inner layers.
9. (Original) Glitter made of said colored iridescent film of claim 1.

10. (Original) Nail lacquer containing said glitter of claim 9.

11. (New) Yarn made of said colored iridescent film of claim 1.

12. (New) The yarn of claim 12, wherein said yarn is resistant to dry cleaning solvent and sunlight.
